

HPA-009

Aroma & flavour

Sweet Fruits

Peach

Citrus

Lemon

Berries & Currants

Breeding

HPA-009 was created by the HPA breeding program in 2007 through a cross-pollination of high yielding, high alpha Australian hops and Galena.

Growing

HPA-009 has shown early promise through internal field and sensory screening. Propagation has begun for crop 2027, with small-scale commercial plots planned for crop 2028.

Deployment stage

HPA-009 is an **Emerging** variety from our [Next in Bine Program](#). A very limited quantity is available from crop 2026 for pioneering brewers with a pilot system who want to help shape the next generation of Aussie hops. Increased quantities are expected from crop 2028 for adventurous brewers with small commercial systems.

Deployment stage and flavour descriptors may be refined as brewer feedback is incorporated.

Analytical data

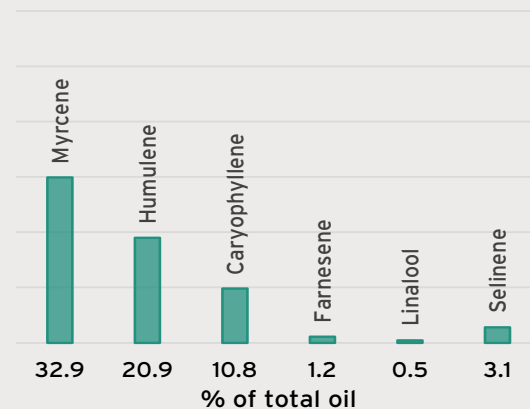

Alpha 12.1%

Beta 6.6%

Cohumulone 43.0 - 49.0% of α -acids

Total oil 1.7ml/100g

Hop oil composition

Recommended beer styles

Pale Ale, IPA
