

HPA-031

Australia

Aroma & flavour

Citrus

Orange

Sweet Fruits

Mango, Melon

Green Fruits

Green Grapes

Herbal

Green tea

Breeding

HPA-031 was created by the HPA breeding program in 2006 through a cross-pollination of high yielding, high alpha Australian hops with European aroma hops Saaz and Hallertau Mittlefrueh.

Growing

HPA-031 has been producing consistent yields in field trials since 2012.

Contracting

HPA-031 has been producing consistent aroma impact in brewing trials since 2015, and will remain in HPA's breeding program for now, pending enough acreage availability to consider commercialising a lager hop.

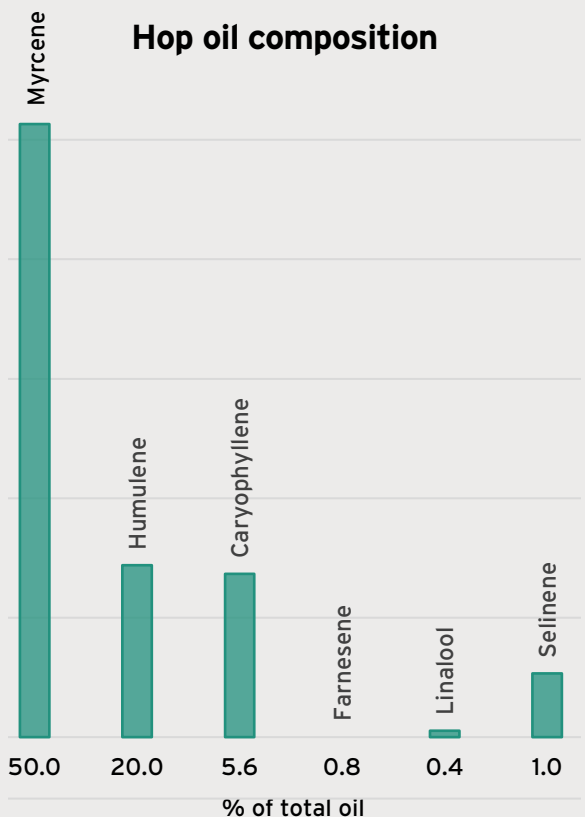

Analytical data

Alpha 9.0 %

Beta 6.6 %

Cohumulone 41.0 % of α -acids

Total oil 2.0 ml/100g

Note: HPA's Next in Bine experimental hops may become unavailable in future years. A very select few will be commercialised based on meeting our agronomic objectives and achieving brewer acceptance.
