

HPA-035

Australia

Aroma & flavour

Citrus
Orange

Sweet Fruits
White peach

Spicy
White Pepper

Breeding

HPA-035 was created by the HPA breeding program in 1998 through a cross-pollination of high yielding, high alpha Australian hops with European aroma hops Hallertau Mittlefrueh and Perle.

Growing

HPA-035 has been producing consistent yields in field trials since 2009.

Contracting

HPA-035 has been producing consistent aroma impact in brewing trials since 2011, and will remain in HPA's breeding program for now, pending enough acreage availability to consider commercialising a witbier hop.

Analytical data

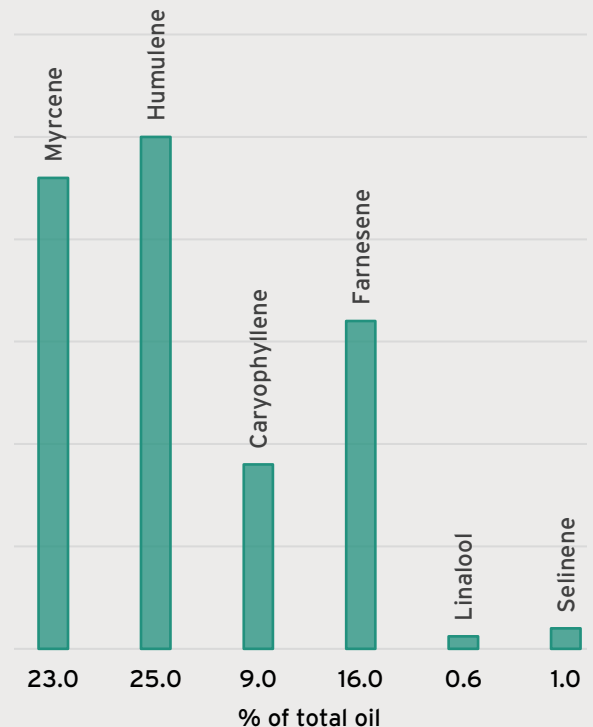

Alpha 6.7 %

Beta 6.3 %

Cohumulone 20.0 % of α -acids

Total oil 1.1 ml/100g

Hop oil composition

Note: HPA's Next in Bine experimental hops may become unavailable in future years. A very select few will be commercialised based on meeting our agronomic objectives and achieving brewer acceptance.
