HPA-077

Aroma & flavour

Berries & Currants

Herbal
Green Tea

Citrus
Lime

Breeding

HPA-077 was created by the HPA breeding program in 2011 through a cross-pollination of two high yielding, high alpha Australian hops.

Growing

HPA-077 has shown early promise through internal field and sensory screening. Propagation has begun for crop 2027, with small-scale commercial plots planned for crop 2028.

Deployment stage

HPA-077 is an **Emerging** variety from our Next in Bine Program. A very limited quantity is available from crop 2026 for pioneering brewers with a pilot system who want to help shape the next generation of Aussie hops. Increased quantities are expected from crop 2028 for adventurous brewers with small commercial systems.

Deployment stage and flavour descriptors may be refined as brewer feedback is incorporated.

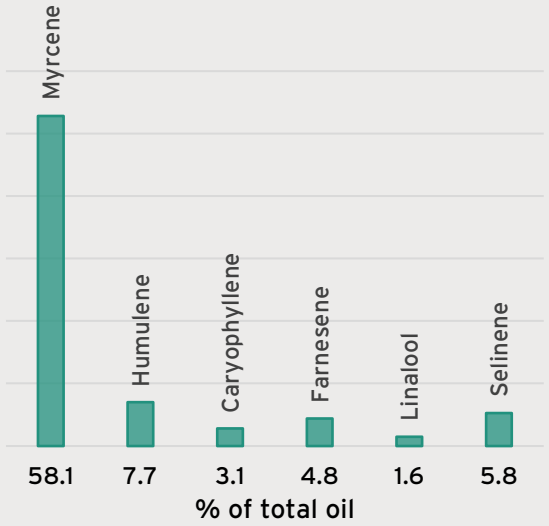
Analytical data

Alpha 7.4% **Beta** 9.5%

Cohumulone 20.0 - 23.0% of α-acids

Total oil 2.4ml/100g

Hop oil composition



Recommended beer styles

Lager, Pale Ale, IPA, WCIPA, NEIPA
