

# HPA-211

## Aroma & flavour

### Sweet Fruits

Peach, Apricot, Mango

### Citrus

Mandarin

## Breeding

HPA-211 was created by the HPA breeding program in 2010 through a cross-pollination of descendants of Hallertau Mittelfrueh and Galena hops.

## Growing

HPA-211 has shown early promise through internal field and sensory screening. Propagation has begun for crop 2027, with small-scale commercial plots planned for crop 2028.

## Deployment stage

HPA-0211 is an **Emerging** variety from our [Next in Bine Program](#). A very limited quantity will be available from crop 2027 for pioneering brewers with a pilot system who want to help shape the next generation of Aussie hops. Increased quantities are expected from crop 2028 for adventurous brewers with small commercial systems.

*Deployment stage and flavour descriptors may be refined as brewer feedback is incorporated.*

## Analytical data

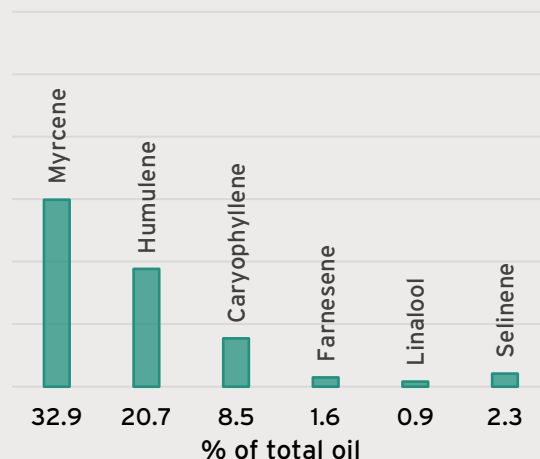

**Alpha** 7.0%

**Beta** 8.2%

**Cohumulone** 26.0 – 31.0% of  $\alpha$ -acids

**Total oil** 1.8ml/100g

### Hop oil composition

### Recommended beer styles

Lager, Pale Ale, IPA

### Share sensory feedback
