

HPA-3029

Australia

Aroma & flavour

Citrus
Lemon

Breeding

HPA-3029 was created by the HPA breeding program in 2003 through a cross-pollination of high yielding, high alpha Australian hops with Liberty, a U.S.D.A. breeding program aroma hop.

Growing

HPA-3029 has been producing consistent yields in field trials since 2008.

Contracting

HPA-3029 has been producing consistent flavour impact in brewing trials since 2019, and will remain in HPA's breeding program for now, pending changes in consumer tastes.

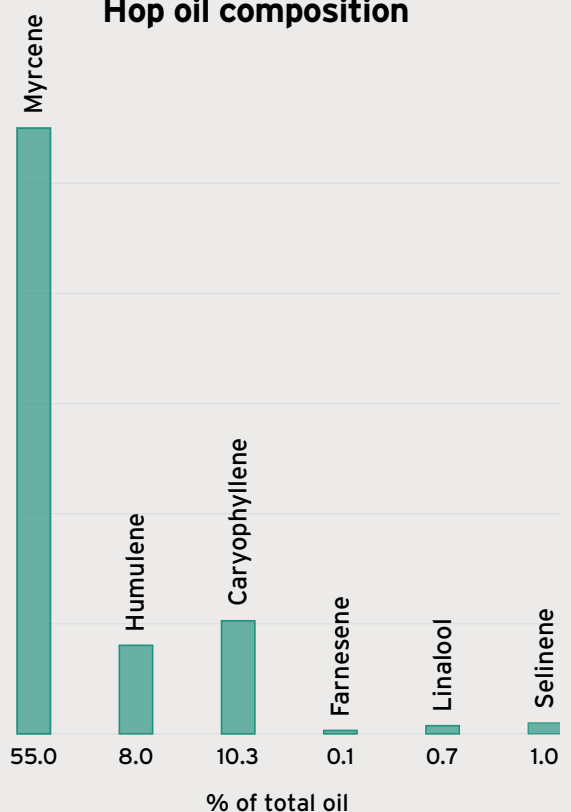

Analytical data

Alpha 18.5 % **Beta** 8.4 %

Cohumulone 34.0 % of α -acids

Total oil 5.6 ml/100g

Hop oil composition

Note: HPA's Next in Bine experimental hops may become unavailable in future years. A very select few will be commercialised based on meeting our agronomic objectives and achieving brewer acceptance.
