

NEXT IN BINE PROGRAM

Since the 1950s, our hop breeding program has evolved from developing classic bittering hops to creating exceptional flavour varieties. That same spirit of innovation drives our search for HPA's next commercial release. These are the experimental hops currently progressing through the different deployment stages of our Next in Bine Program.

Elite

Building towards commercial release

Experimental varieties being seriously considered for commercial release, with strong performance validated through commercial field and brewing trials. A meaningful quantity is available for brewers of all sizes to conduct full production-scale testing. Commercialisation is dependent on contracted demand and sufficient market opportunity.

[HPA-050](#) - Lime, Pear & Cedar

Evolving

Gaining momentum with brewers

Experimental varieties that have progressed beyond internal screening, exhibiting strong potential through small-scale field and brewing trials. A limited quantity is available for adventurous brewers with small commercial systems whose feedback will influence whether acreage increases for more reliable commercial supply.

[HPA-031](#) - Lemon, Melon & Green Tea

[HPA-065](#) - Lime, Ginger & Herbal

[HPA-4029](#) - Tropical Fruit

Emerging

Pioneering the future of hops

Experimental varieties that represent the cutting edge of HPA's breeding program, showing early promise through internal field and sensory screening. A very limited quantity is available for pioneering brewers with dedicated pilot systems who want to help shape the next generation of Aussie hops.

[HPA-009](#) - Peach, Lemon & Berries

[HPA-035](#) - Orange, Stone Fruit & Black Tea

[HPA-051](#) - Lemon, Lime & Mandarin

[HPA-055](#) - Apricot, Lemon & Mint

[HPA-063](#) - Limoncello & Kiwi

[HPA-077](#) - Berries, Green Tea & Lime

[HPA-211](#) - Peach, Apricot & Mandarin
